

## EasyTrak OBD – Installation Guide

### Locate your OBDII Port

Locate the OBDII port within your vehicle. This is usually found under the dashboard on the driver's side or it is sometimes located in the glove box on some vehicles.

### Extension Cable

In some cases, it is required to use the extension cable to relocate the location of the OBD device, to avoid it being hit by a foot under the dash or if the device stick out of the glove box.

To connect the extension cable, plug the OBD device into the female end of the extension cable.

### Install the Device

Plug the device or the male end of the extension cable into your OBDII port.
