

# AssetTrak

In situations where assets need to be temporarily tracked and no external power source is available, AssetTrak offers a unique solution. The compact device can be covertly attached to any steel surface using its powerful built in magnets and once attached will allow an asset to be tracked using our standard web based mapping system.

Having a simple-to-install covert tracking device allows organisations to track assets easily without the high costs associated with a fixed installation.

Being stand-alone offers many applications for this solution including temporary asset tracking and surveillance.

Covert stand-alone tracking device magnetically fixes to any steel surface.

## AssetTrak provides users with the following list of impressive features as standard:

- No hidden costs, monthly fee includes device, network charges and lifetime warranty Compact device size measuring only 96mm x 50mm x 42mm
- Magnetic installation to any steel surface within seconds
- No external power required
- Built in GPS and GSM antennas
- Covert installation which can be relocated easily
- Configurable tracking intervals to conserve battery life

- Weatherproof allowing external fixing
- Unlimited access to our 'easy to use' web based mapping via any Internet connection
- Full training and 24/7/365 telephone support
- Comprehensive reporting module
- Built in tamper switch which notifies removal
- Rechargeable battery

Options to integrate with other CMS products ensures your investment in SupaTrak is future proof and will adapt as your business requirements change.
