

SupaTrak Lite

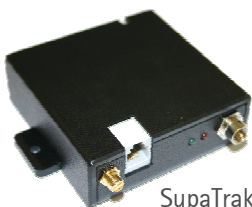

Included functionality

The new SupaTrak Lite solution from CMS SupaTrak has been launched to support businesses that require a low cost and simple to use vehicle tracking solution with basic or limited functionality. SupaTrak Lite is a web-based system that is easily customisable and upgradable by the user, to reflect the changing requirements of their business.

The SupaTrak Lite package includes the following elements for the all inclusive price of £499 or £16.31 per month for a 36 month contract, with no additional charges to pay:

All vehicle hardware
Weekday in-hours installation by a CMS SupaTrak Engineer
Ten minute location updates
One week's data history, including history list and trail
Standard UK mapping
Single user licence
Detailed and summary reports
Online training
Support via our online support portal

SupaTrak Lite Black Box

Additional functionality

If a user requires additional bolt-ons, they are able to upgrade their account by hand-picking the features from the a-la-carte menu style list, available online 24 hours a day, 365 days a year. Each of these additional items are priced individually and are charged to the user on a monthly basis.

These additional features include:

One to one telephone training	Points of interest
De and Re installations	Scheduled reports
Driver text messaging	Ring fencing
London Congestion & Emission Zone	Additional users/licenses
Routing	Compliance reporting suite
Circuits to segregate views of fleet	Time Sheet reporting
Satellite imagery	Twelve months history of data
Options for either 60 second or 5 minute updates	Location search by address and postcode
In hours telephone support	Traffic Alerts

The successful standard SupaTrak solution is well suited to businesses that require a more comprehensive solution. If at any time users of the SupaTrak Lite package decide that they wish to upgrade to this, they can do so by contacting their Account Manager.
